Declaration of innocuousness for health & safety

Please send his paper with goods, or send it as letter, Fax or E-Mail

Dear Customer

We want to protect our staff against health threat which could happen by rest contents of the valves.

For this reason, we ask for your understanding. We only can proceed a repair, if we receive a declaration of innocuousness for health & safety. Please fill out that form completely and sign it.

Please send back only, valves that have been cleaned before sending, and confirm the innocuousness of the cleaned valve or that the substance is harmless.

For substance or products that are toxic or hazardous, that accord to the regulatory of "Ordinance on Hazardous Substances", must attach the material safety data sheet at this declaration.

For the case, that we receive a contaminated valve, without this explanation of innocuousness, or we get a valve which type of construction where we suspect, that it's contaminated, (phosgene-valve, or valves lined in with PTFE) LESER reserve itself the right to send back the valve, carriage forward, to your address.
